

# DATA INTEGRATION

## Options

**Adopting data integration is a strategic decision that increases business velocity and improves customer experience.**

Choosing the right integration method is a multi-step process that starts with a clear definition of your business needs.

Whether you're looking into switching to a more agile platform or already using one of our data integration solutions but considering an upgrade, understanding the key capabilities of each is vital for your business success.

Functionality/Requirements	WEBSITE dayross.com	API	Dart e-commerce integration	EDI
Real-time Data Transfer	●	●	●	
Process Automation		●	●	●
Shipping Manifest			●	
Labels	●	●	●	
Bill of Lading (BOL)	●	●		
Web/E-store Integration			●	
Order System Integration		●	●	●
Batch Order Import			●	
Computer & Internet Required	●		●	
Printer Required	●	●	●	
Developer Setup Cost		IT development required	Varies	IT development required
Ongoing Service Cost				●

While all these four options enable process automation, they offer different benefits and setup requirements.

**Dart**, our tool for e-commerce integration, is the right solution if you need:

- ✓ Web/e-store integration
- ✓ Shipping manifest
- ✓ Batch order import
- ✓ Shipment consolidation

If you want to learn more about **Dart**, contact us at [web.support@dayross.com](mailto:web.support@dayross.com).

### Notes

- Dart is currently available only for existing shipping system users (Commerce Solutions/Home Delivery)
- Shipment Consolidation will be available by November 2025 when Dart is offered to both Home Delivery and LTL customers
